HealthConnect Rwanda — Week 7 Data Analytics

Additional Dataset Addendum

This addendum incorporates the 10 additional CSV uploads into the existing Week 7 analysis. The original source files are preserved in Source_Data.

New files reviewed

File	Rows	Columns	Note
HC_Services (2).csv	400	3	Exact duplicate of HC_Services.csv
HC_Services.csv	400	3	—
Insurance_Claims.csv	42036	5	—
Laboratory_Scientist.csv	40	10	—
Ownership_Types.csv	4	2	—
Payments.csv	60000	4	—
Pharmacist.csv	50	10	—
Provinces.csv	5	3	—
Sectors.csv	120	3	—
Villages.csv	480	3	—

Additional validation results

HC_Services.csv vs HC_Services (2).csv — Exact match

Both contain 400 rows and 3 columns; identical data. Retain one canonical copy.

HC_Services.csv → facility workbook Services sheet — Pass

Exact match; all 400 service DepartmentID values match HC_Departments.

Insurance_Claims.BillingID → HC_Billing.BillingID — Pass with coverage note

42,036 claims; all link to billing. 17,964 of 60,000 billing records have no claim record in this extract.

Insurance claim amounts vs billing — Reconciliation required

ClaimAmount total 4,881,863,293.88; billed Amount for claimed records 6,508,764,101. Claim amounts are lower on all 42,036 matched rows; do not assume claim amount equals approved/paid amount.

Insurance claim status — Coverage note

21,008 Approved and 21,028 Pending; no rejected status in this extract. Pending is not necessarily denied.

Payments.csv vs HC_Payments.csv — Exact match

New Payments.csv is identical to the previously supplied HC_Payments.csv (60,000 rows).

Geographic hierarchy — Pass

5 provinces, 30 districts, 120 sectors and 480 villages; all District→Province, Sector→District and Village→Sector keys match.

Laboratory_Scientist.csv — Pass

40 active staff; no duplicate StaffID; all FacilityID and DepartmentID references valid; no ID overlap with previously supplied staff files.

Pharmacist.csv — Pass

50 active staff; no duplicate StaffID; all FacilityID and DepartmentID references valid; no ID overlap with previously supplied staff files.

Ownership_Types.csv — Reference only

4 ownership categories: Government, Private, Faith Based, NGO. No facility master table with OwnershipID was supplied, so assignment coverage cannot be tested.

Important interpretation safeguards

The claims extract contains approved and pending statuses only; the absence of rejected records in this file does not prove that no rejected claims exist in the full system. ClaimAmount should not be treated as payment, reimbursement, or recognized revenue without business definitions. Ownership categories are reference values only until linked to a facility master table. The two HC_Services files are exact duplicates; use one canonical copy.
