6 pages | 90 visual definitions | 94 referenced fields/measures

Executive Dashboard: 15 visuals
Patient Analytics: 15 visuals
Clinical Analytics: 16 visuals
Financial Dashboard: 15 visuals
Operational Dashboard: 17 visuals
Patient Experience: 12 visuals

Validation outcomes

Package integrity — PASS: PBIX ZIP archive readable; report definition and DataModel are present.

Page definitions — PASS: 6 report pages parsed.

Visual definitions — PASS: 90 visual definitions parsed; not a visual-render test.

Field reference extraction — PASS: 94 field/measure references found (including repetitions).

DataModel / DAX execution — NOT TESTED: Model is embedded in binary DataModel; DAX measures cannot be evaluated here.

Visual rendering and interactions — NOT TESTED: Requires Power BI Desktop or Power BI Service.

Refresh and data-source credentials — NOT TESTED: Requires source configuration and Power BI execution.

Billing / appointment ID reconciliation — DATA ISSUE: Previously measured: 55,000 of 60,000 billing rows do not match 5,000 appointment IDs in supplied extract.

Facility-department alignment — DATA ISSUE: Previously measured: 4,744 of 5,000 appointment rows disagree with department facility.

Insurance claims coverage — DATA OBSERVATION: 42,036 claims linked to billing; 17,964 billing records have no claim in extract.

Service/payment duplicate exports — PASS: Services duplicate upload and Payments vs HC_Payments are exact copies.

Limitations: Power BI Desktop runtime, refresh, DAX evaluation and interaction tests were not performed. Original PBIX unchanged.
